Microscopy Laboratory Acknowledgment and Authorship Policies- Aug 2017

Dear Microscopy Laboratory Users:

You are required to acknowledge NYU School of Medicine’s Microscopy Laboratory in all publications, presentations, grant applications, media releases, and other forms of media when you use our equipment, technologies, or expertise, or generate data at the lab. If a publication including data generated here fails to acknowledge the microscopy laboratory, the remedy will be having the journal issue an official addendum, erratum, correction, amendment, or its version of such which is Pubmed registered. As a courtesy and for copyright purposes, we also request that you inform us of the publication and any images created by the lab’s staff or instruments.

- For data collected with the Zeiss LSM 710 please cite grant “NCR R S10 RR023704-01A1”.
- For data collected with the Nikon TIRF system please cite “P01A1080192”.
- For data collected with the Leica SP5 confocal system please cite “NCR R S10 RR024708”.
- For data collected with the Zeiss Gemini SEM with 3View please cite “S10 OD019974-01A1”.

Please consider authorship when our staff members contribute significantly to the development of your experimental design or to your publication content. Before you begin your experiment, please sign this acknowledgment form indicating that you understand and agree to this policy. Email to Dr. Liang at fengxia.liang@nyumc.org

We do our best to meet your service expectations. If you have any questions, please contact us.

Sincerely,

Alice Liang, Ph.D
Director, Microscopy Laboratory
